India's Developer Platform for UI Components, Coding Challenges & Career Growth

Platform Overview | Developer Guide | 2026 Edition

No-Code	2020	India	Free
Platform Type	Founded	HQ	Access Tier

ABOUT THEZIFT

TheZift is an Indian tech platform founded in 2020, designed to empower developers, students, freshers, and IT professionals. It serves as a one-stop destination combining a UI components marketplace, a developer job board, coding practice challenges, and a no-code/low-code platform for building web and mobile applications.

The platform bridges the gap between learning and industry — letting developers discover verified, production-ready components, practice real-world problems, compete in coding challenges, and connect with top startups and growing tech companies.

Developer Tools | No-Code / Low-Code | UI Components | Job Board | Made in India

KEY FEATURES & OFFERINGS

UI Components Marketplace	Discover, test, and integrate production-ready UI components into your projects. All components are verified and ready to deploy — saving hours of development time.
Coding Challenges & Practice	Sharpen your programming skills with real-world coding challenges. Practice DSA, frontend tasks, backend logic, and more in an interactive coding environment.
Developer Job Board	Find the latest tech jobs, internships, and hiring opportunities from startups and growing companies. TheZift Jobs app is available on Google Play for quick job discovery.
No-Code / Low-Code Builder	Build, customize, and deploy digital products using industry-specific templates and backend-integrated tools — no deep coding knowledge required.
Developer Competitions	Participate in coding competitions and hackathons to showcase your skills, win prizes, and get noticed by top recruiters.
Career Growth Tools	Freshers, students, and experienced developers can advance their careers using TheZift's structured learning path, portfolio tools, and job matching features.

WHO IS THEZIFT FOR?

Students & Freshers	Learn to code, build projects, and get job-ready with structured challenges and a strong portfolio.
Frontend Developers	Save time with plug-and-play UI components. Stop rebuilding from scratch every project.
Startups & SMBs	Use the no-code/low-code builder to launch products fast without a full dev team.

Freelancers	Access verified templates and components to deliver client projects faster and more efficiently.
IT Professionals	Stay updated, upskill through challenges, and discover new career opportunities via the job board.

WHY CHOOSE THEZIFT?

✓ Made in India — Built specifically for the Indian developer ecosystem with local job opportunities.

✓ All-in-One Platform — Components + Jobs + Challenges + Builder in a single ecosystem.

✓ Production-Ready Components — Every UI component is tested and verified before listing.

✓ Free Access — Core features available for free; no heavy paywalls blocking learning.

✓ Growing Community — Active developer community competing, collaborating, and growing together.

✓ No-Code Friendly — Even non-developers can build functional apps with the low-code builder.

✓ Mobile App Available — TheZift Jobs app on Google Play for on-the-go job searching.

HOW TO GET STARTED WITH THEZIFT

Step 1	**Visit thezift.com**	Open your browser and go to the official TheZift platform.
Step 2	**Create Free Account**	Sign up using your email or Google account — completely free.
Step 3	**Explore Components**	Browse the UI components marketplace and filter by category, framework, or style.
Step 4	**Start Coding Challenges**	Pick a challenge from the practice section and start sharpening your skills.
Step 5	**Set Up Job Profile**	Complete your developer profile and start applying for jobs and internships.
Step 6	**Build with No-Code**	Use the low-code builder to create your first web app using templates.
